► Fixtures

Consult factory for matching Sloan brand fixture options.

► Automatic Operation

Sloan ECOS® Flushometers can also be activated via multi-lobular infrared sensor. By detecting user presence and duration, the Sloan ECOS® Smart Sense Technology™ will determine the proper flush volume for unequalled water efficiency.

► Manual Operation

Sloan ECOS® Electronic Flushometers incorporate intuitive button design for easy manual activation. Straightforward graphics alert user to proper activation. The reduced flush for liquid waste or full flush for solid waste. To further educate the user, two (2) instructional wall plates are included with each Sloan ECOS® Flushometer.

► Functional & Hygienic

Touchless, sensor operation eliminates the need for user contact to help control the spread of infectious diseases. The Sloan ECOS® Electronic Flushometers are provided with Override Buttons to allow a "courtesy flush" for individual user comfort.

Operating Pressure

- 15 - 100 psi (104 - 689 kPa)

RESS-C units do NOT include a Valve Body, Supply Stop or Vacuum Breaker.

1. A continuous, invisible light beam is emitted from the Sloan ECOS® Flush Sensor.

2. As the user enters the beam's effective range, 22" to 42" (559 mm to 1067 mm), the beam is reflected into the Scanner Window to activate the Output Circuit. Once activated, the Output Circuit continues in a "hold" mode for as long as the user remains within the effective range of the sensor. If the user stays longer than 65 seconds, a full flush will automatically initiate when the user leaves.

3. Once a user is detected, if the user leaves in 65 seconds or less, a reduced flush will automatically initiate. The circuit automatically resets and is ready for the next user.
