Handle Adaptor Kits (specify separately)

The SMO can be used on standard rough-in Sloan Royal, Regal, Crown and Naval brand Flushometers as well as on flush valves manufactured by Zurn and Helvex.

When installing an SMO on a "high rough-in" valve (where the handle is more than 18" (450 mm) above the top of the fixture), an Adaptor Kit is recommended (specify separately):

☐ EBV-114 High Mount Adaptor Kit

Handle Adaptor Kits are also required to use the SMO on the following flush valves (specify separately):

☐ EBV-157 Adaptor Kit for Sloan Gem Flushometers
☐ EBV-106 Adaptor Kit for Tempest Flush Valves
☐ EBV-107 Adaptor Kit for Teck Flush Valves
☐ EBV-113 Adaptor Kit for Crane Flush Valves

For Coyne and Delany Flushboy Valves, use SMO model:

☐ EBV-89-M-CD SMO for C&D Flush Valves – Metal Cover
☐ EBV-89-P-CD SMO for C&D Flush Valves – Plastic Cover

Visual Indicator Guide

- USER-IN-VIEW L.E.D. — Green light flashes 3 times after 5 second delay when a user is in view. The green light flashes constantly when a user is in view during the 7 minute start up sequence.
- BATTERY L.E.D. — Yellow light flashes indicating it is time to replace batteries with four (4) new Type “C” batteries.
- OBJECT LOCK SENSOR — Detects user or object.
- COURTESY MANUAL FLUSH BUTTON — Allows manual activation of flush when needed.

Side Mount Operator units do NOT include a Valve Body, Supply Stop or Vacuum Breaker.

ADA Compliant

Automatic

Sloan OPTIMA SMO equipped Flushometers provide the ultimate in sanitary protection and automatic operation. There is no need for AC hookups or wall alterations. The Flushometer operates by means of a battery powered infrared sensor. Once the user enters the sensor’s effective range and then steps away, the Side Mount Unit initiates the flushing cycle to flush the fixture.

Hygienic

User makes no physical contact with the Flushometer surface except to initiate the Override Button when required. Helps control the spread of infectious diseases. 24 Hour Sentinel Flush keeps fixture fresh during periods of nonuse.

Economical

Automatic operation provides water usage savings over other flushing devices. Reduces maintenance and operation costs. Installation and battery replacement does not require turning off water to the valve.

Warranty

3 year (limited)

**OPERATION**

1. A continuous, invisible light beam is emitted from the Object Lock Infrared Sensor.

2. As the user enters the beam’s effective range, 8” to 54” (203 mm - 1372 mm), the Object Lock Infrared Sensor senses the user.

3. When the user steps away from the Object Lock Infrared Sensor, the circuit initiates the flushing cycle to flush the fixture. The Circuit then automatically resets and is ready for the next user.
